Universal Pre-Kindergarten Health Screening Resources

Know what your child's blood lead test results means:

Lead can cause problems with learning, hearing, speech and behavior.

What should I do if I think there is lead in my home?	Contact your local health department to schedule an inspection right away! <i>(see the helpful numbers and websites at the bottom of this page)</i>
Avoid dry dusting or sweeping. Wet mop all floors and window sills.	Make sure your children wash their hands often.
Plant grass to cover bare dirt in the yard. Wash toys when they have been on the ground.	Duct tape over any cracking or peeling paint until a qualified professional removes repairs or covers the lead paint.

<u>What do the lead levels mean and what should I do if my child shows and elevated lead level?</u>	
Blood Lead Value 0-4	<ul style="list-style-type: none"> Your child should be tested for lead once a year until they turn 6 years old. Lead levels less than 5 mean there is low level lead exposure Call your health department to learn more about lead and how to make your home lead safe.
5-9	<ul style="list-style-type: none"> Your child will need a blood test every 2-3 months until the level is less than 5. Schedule this follow-up testing with your doctor's office. A case manager will call or send you a letter with advice about your child's lead level. The other children under 6 years old in your home need to be tested also.
10-19	<ul style="list-style-type: none"> Your child will need a blood test in 1-2 months, and then repeat testing until the number is less than 5. Schedule this follow-up testing with your doctor's office. A case manager from the health department will call to talk about your child's lead level and help you learn more about lead. The health department will want to check your home for lead.
20-44	<ul style="list-style-type: none"> You child will need a blood test in 2-4 weeks, and then repeat testing until the number is less than 5. Schedule this follow-up testing with your doctor's office. A case manager from the health department will talk to you by phone to let you know what to do for your child. Your home may be checked for lead by the health department.
45 or Higher	<ul style="list-style-type: none"> YOUR CHILD <u>MUST</u> GO SEE A DOCTOR OR GO TO THE HOSPITAL <u>TODAY</u>. Your child must be treated with a special medicine to help lower their lead level. Repeat testing 3-4 weeks after treatment. Re-treatment may be necessary. Your home must be checked for lead by the health department as soon as possible. A case manager from the health department can visit your home or talk to you by phone to let you know what to do for your child.

Universal Pre-Kindergarten Health Screening Resources

Universal Pre-Kindergarten Health Screening Requirement Acknowledgement Form

Dear Parent(s)/Caregiver,

As part of the Universal Pre-Kindergarten program your child must have certain health screenings. These screenings may help prevent future problems with your child’s health. Some of these screenings may be offered by your child’s preschool. If not, a list of resources is attached for those screenings that may not be provided by your child’s preschool.

Thank you!

Below is a list of required screenings

- ❖ Lead screening
- ❖ Hematocrit/Hemoglobin screening
- ❖ Dental screening
- ❖ Vision screening
- ❖ Hearing screening

Your signature below verifies that you are aware of the medical screenings your child needs; confirms that you received the necessary forms for your doctor or dentist to complete; and confirms that you received the list of local resources available to assist you with completing the medical screenings.
